

HME Introduces New HS16 Lightweight Headset

SAN DIEGO, CA – April 6, 2009 – HME is pleased to announce the release of its new HS16 Lightweight Headset, an incredibly durable headset with directional microphone, for their DX Series of Digital Wireless Intercom Systems. The HS16 is lightweight for user comfort, sturdy to ensure reliability and prolonged durability, and was engineered for the superior sound clarity required for intercom communication.

According to HME Pro Audio Product Manager Rick Molina, “The HS16 provides crystal-clear audio in a lightweight headset that is built to last. It is competitively priced and carries a two-year warranty, whereas competitive products offer a 90-day warranty.”

The comfortable single muff headset with noise-canceling electret microphone can be worn on either ear. The flexible microphone boom ensures optimal positioning for best sound quality. An adjustable stainless steel headband provides a stable, comfortable fit, while ensuring secure continuous positioning of the microphone boom. The stainless steel cables, tinsel conductors and reinforced connectors contribute to the very robust but lightweight design.

For more information about the HS16 Lightweight Headset or other HME products, please call 1-800-848-4468 in the U.S. or 1-858-535-6060 internationally. Log on to www.hme.com.
