

FOR IMMEDIATE RELEASE**Historic Alaska restaurant, *The Pump House*, adds HME Wireless' server paging to its sprawling surroundings and pristine setting to deliver food hot and fresh**

September 17, 2010 – Atlanta, GA –*The Pump House* restaurant in Fairbanks, Alaska, has taken customers back in time since 1933, surrounded by one-of-a-kind antiques and a magnificent, natural setting. But as the restaurant grew in both popularity and size, owner Bill Bubbel knew it was time to take a step forward, with an HME Wireless [server paging system](#).

The sprawling restaurant features two large dining rooms, the Senator Saloon, Banquet Room, Antique Game Room, and a huge outside deck. So naturally, getting in touch with servers when food is ready is a critical challenge. Outfitted with HME Wireless' [restaurant pagers](#), servers can now stay out on the floor taking care of guests, knowing that the second an order is ready they will be contacted instantly by the kitchen.

“The big issue way up here is service and support,” said Bubbel. “We need products that will last, and are supported when we need it, so paying for quality has been well worth it. Since *The Pump House* upgraded to HME Wireless' [server pagers](#), we've never looked back.”

Summer tourist season is an especially busy time for [The Pump House](#), and Bubbel says the HME Wireless' server paging system has been critical to the success of the whole operation.

“Food doesn't get any fresher than this,” added Bubbel. “We use herbs from the chef's garden, and salmon delivered by floatplane right to the dock. Our waiter paging system ensures that it is delivered fresh and hot on time, every time.”

Some of the more interesting antiques at *The Pump House* include a 1930-National Shuffleboard, a solid mahogany bar, and an historic Brunswick Union League pool table built in 1896. The pool table traveled through a number of Alaska Gold Strike towns up and down the Yukon, before coming to *The Pump House* in 1977.
